FAMILY TABLE WORKSHOP # 1

EAT HEALTHY - PORTIONS & PROPORTIONS: "It's all about Balance."

Lifestyle in balance is a tool for living long and for the prevention of non-communicable diseases. In this workshop, we will explore how balanced nutrition and lifestyle allow us to live healthy here and now and in the future.

We will investigate the differences and consequences of inactive vs. active lifestyles, the role of technology in postmodern life, and the importance of contact with nature and sociality. We will learn about healthy eating and how to prepare a healthy snack or lunch. We will finish our workshop with a brief seated yoga practice (on a chair) that we can use to start our daily routine at school.

Date: March 21, Thursday

Time: 2:30 – 3:30

1. INTRODUCTION

- **Welcome and Acknowledgment**
 - Welcome participants and experts.
 - Acknowledge any special guests or experts in attendance.
- **Agenda Overview:**
 - A brief overview of the purpose and agenda.

2. BALANCED NUTRITION & LIFESTYLE

- **Interactive Icebreaker**
